

EPC Efficiency Impact on Sale Property Supply and Price per m²

Insights Observed:

- **Volume Distribution:** High-efficiency listings (A++ to B) dominate market availability with nearly 3,500 units, followed closely by medium tier (C, D)
- **Aggressive Green Premium:** High-efficiency properties command the highest median price at €3.2K per m².
- **Steep Value Drop:** Dropping to a medium-efficiency rating triggers a significant **27%** price drop to €2.4K per m², while low-efficiency properties hit a floor of €2.0K per m² (**41%** total discount from the top tier).

Limitations:

Number of Properties (with EPC Value)	Listing Mode	Website Scraped	Scraped Date
