

IMMO ELIZA • BELGIAN RESIDENTIAL MARKET

Where — and what — to buy for the best return

A data-driven guide for the buy-to-let investor

18,686

listings analysed

565

municipalities

Yield + Growth

= total ROI

01

THE CLIENT & THE VALUE QUESTION

Who we're advising, and what drives price

What makes a Belgian property valuable?

Presenter: Maha

Meet the investor we're advising

LÉA • 42

Buy-to-let property investor

GOAL

Grow her capital by buying property to rent out.

DECISION RULE

Yield = $\text{rent} \div \text{buy price}$. The cheaper the buy versus the rent it earns, the better.

PAIN POINT

A great rental can still be a poor investment if its value stalls.

“Therefore the yield — how the buying price relates to the rent price — is decisive.”

— Immo Eliza customer brief

So we answer two things for Léa:

1. What makes a property valuable?
2. Where & what gives the best TOTAL return = rental yield + price growth?

KEY INSIGHT

We rank every Belgian municipality on total ROI — rent today plus value tomorrow — so Léa knows exactly where, and what, to buy.

What actually drives a property's price?

Living area

strongest price driver

**Bathrooms • Bedrooms •
Toilets**

size of the home

Location

postal code & cadastral income

KEY INSIGHT

Size & sanitary rooms — living area, bathrooms, bedrooms, toilets — drive price most; location next. Amenities barely move it.

THE MARKET

Prices, supply & energy efficiency

Where is value concentrated — and what commands a premium?

Presenter: Alex

What actually drives a property's price?

5 urban area on the market

Total properties in the area
of 5 cities
6,712

Apartments: 4,280
Houses: 2,432

KEY INSIGHT

Size & sanitary rooms — living area,
bathrooms, bedrooms, toilets —
drive price most; location next.
Amenities barely move it.

Brussels is deepest & priciest — the provinces are where yield hides

KEY INSIGHT

Brussels dominates price AND supply (3,516 listings; houses ~€895K). Provincial cities are far cheaper — Charleroi houses ~€169K — and cheap-to-buy is where high yield lives.

Energy rating is priced in — and it's a lever for investors

EPC Efficiency Impact on Sale Property Supply and Price per m²

EPC Efficiency Impact on Sale Property Supply and Price per m²

KEY INSIGHT

Top-rated homes fetch ~€3.4K/m² vs ~€1.8K/m² for the worst — a ~90% premium. Cheap, low-EPC stock = higher gross yield now, with renovation upside later.

THE INVESTOR'S PAYOFF

From rental yield to total ROI

Where — and what — delivers the best total return over time?

Presenter: Stephane

Gross rental yield: 3% in Brussels to 7.5% in Wallonia

up to ~7.5%
best (e.g. Verviers)

6.8%
Charleroi

~5.4% / ~3.2%
national / affluent Brussels

KEY INSIGHT
Best yields are in affordable Walloon cities and outer-Brussels; affluent central Brussels yields least.

But yield isn't everything — prices also appreciate

+71%

2010 → 2025

~3.6%/yr

long-run growth

€558K / €247K

Brussels / Wallonia house, 2025

KEY INSIGHT

Prices rose ~71% in 15 years (~3.6%/yr). Where you buy shapes the capital gain too — so combine both forces.

Total ROI = rental yield + price appreciation

KEY INSIGHT

The winners sit top-right — high yield AND high growth — and they cluster in affordable Walloon markets. Greener on the map = better total ROI.

Where & what to buy for the best total ROI

Top 5 municipality + property type by 10-year total ROI (rental yield + historical-trend appreciation)

1	Vresse-sur-Semois House · Wallonia	166%	yield 8.6% · +6.0%/yr
2	Florennes House · Wallonia	164%	yield 9.0% · +5.7%/yr
3	Virton House · Wallonia	152%	yield 7.2% · +6.0%/yr
4	Cerfontaine House · Wallonia	142%	yield 9.0% · +4.3%/yr
5	Momignies House · Wallonia	142%	yield 9.0% · +4.3%/yr

KEY INSIGHT

Buy affordable HOUSES in high-yield, steadily-appreciating Walloon markets — then check liquidity before committing.
